

MOBILE AIR HEATER - TGD

The TGD Mobile Air Heaters are direct fired diesel heaters designed for cost effective spot heating

The GD heaters function on the principle of direct fired oil heating. Hereby a powerful fan is used to force air through a combustion chamber where the burner is situated. As the air passes through the burner, all the heat released by the combustion process is transferred to the air stream. This gives the heater a 100% thermal efficiency. The GD heaters operate on oil, kerosene or paraffin

Characteristics

- 100% thermal efficiency
- Ideal for spot heating
- Easy to install
- Easy to operate
- Functions on diesel, kerosene or paraffin
- Photoelectric flame detection safety device
- Safety switch preventing overheating
- Stainless steel combustion chamber
- Build-in oil filter
