

PORTABLE AIR HEATER - TGX

The GX Portable Air Heaters are designed for cost effective spot heating.

Technology

The TGX heaters function on the principle of direct fired gas heating. Hereby a powerful fan is used to force air through a combustion chamber where the burner is situated. As the air passes through the burner, all the heat released by the combustion process is transferred to the air stream. This gives the heater a 100% thermal efficiency. The heat output of the heater can be varied by the manual adjustment of a regulating valve

Benefits

- 100% thermal efficiency
- Heating output manually adjustable
- Ideal for spot heating
- Easy to install
- Easy to operate
- Functions on LPG
- Double solenoid valve for shutting off gas supply
- Safety switch preventing overheating
- Stainless steel outer shell.

Design

TGX heaters operate on Liquid Petroleum Gas, which is a very clean burning fuel. The products on combustion are water vapour and Carbon Dioxide (CO₂).

Características

- Eficacia térmica del 100%
- Ajuste manual del grado de calor
- Fácil de instalar y manejar
- Funciona con GLP
- Válvula solenoide doble para cortar el paso del gas
- Interruptor de seguridad para evitar el sobrecalentamiento
- Protección exterior de acero inoxidable
